

# ARFG WE DELIVER

## *Your Trusted Partner in HLS Global Solutions*

ARFG is a leading integrator in Homeland Security (HLS) and defense, delivering innovative and customized solutions. We excel in crafting tailored, top-tier services that precisely meet your specific needs. From the initial concept to final implementation, we provide simple solutions to complex challenges, ensuring superior results and adapting our strategies to deliver the highest quality outcomes.

- Evolving Homeland Security landscape
- Adaptive security solutions

- Complexities of modern threats
- Tailored solutions

## Our Values

**Client-Centric Approach:** Our journey with each client begins with a thorough understanding of their specific needs, ensuring guaranteed success.

**Commitment to Innovation:** Dedicated to innovation, ARFG excels in cutting-edge technologies, delivering advanced solutions to clients.

**Unmatched Experience:** With decades of experience, ARFG excels in HLS and defense, delivering innovative and effective solutions.

**Comprehensive Project Cycle:** With decades of experience, we guide clients through every project phase, from initial survey to maintenance.

## Our Projects

### Perimeter Security

Implementation of comprehensive security solutions to bolster the security infrastructure across over 50 UN bases within 4 UN missions in Africa.

### Mobile Surveillance

Innovative mobile surveillance solution, excelling in design, manufacturing, integration, delivery, and comprehensive training.

### ICT Services

Provide highly skilled professional resources and project management services for UN's worldwide software development and installation.

### UAS & C-UAS

Innovative UAS & C-UAS solutions, designed to address the growing threat of unauthorized or hostile drones, enhancing security and operational effectiveness.

### Real Time Video

Engineered and implemented turnkey solution for global UN, enabling live video transmissions from Unmanned Aerial Systems (UAS) to a remote control center.

### Green Energy

Protecting over 30 wind turbines, integrating cutting-edge technology with advanced control systems, ensuring robust security and operational efficiency.

### Border Control

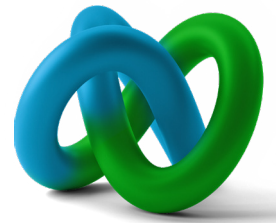

G2G project for consultancy and implementation approach of advanced surveillance with sensors and AI analytics, enhancing Argentinean border control.

### Fusion Center

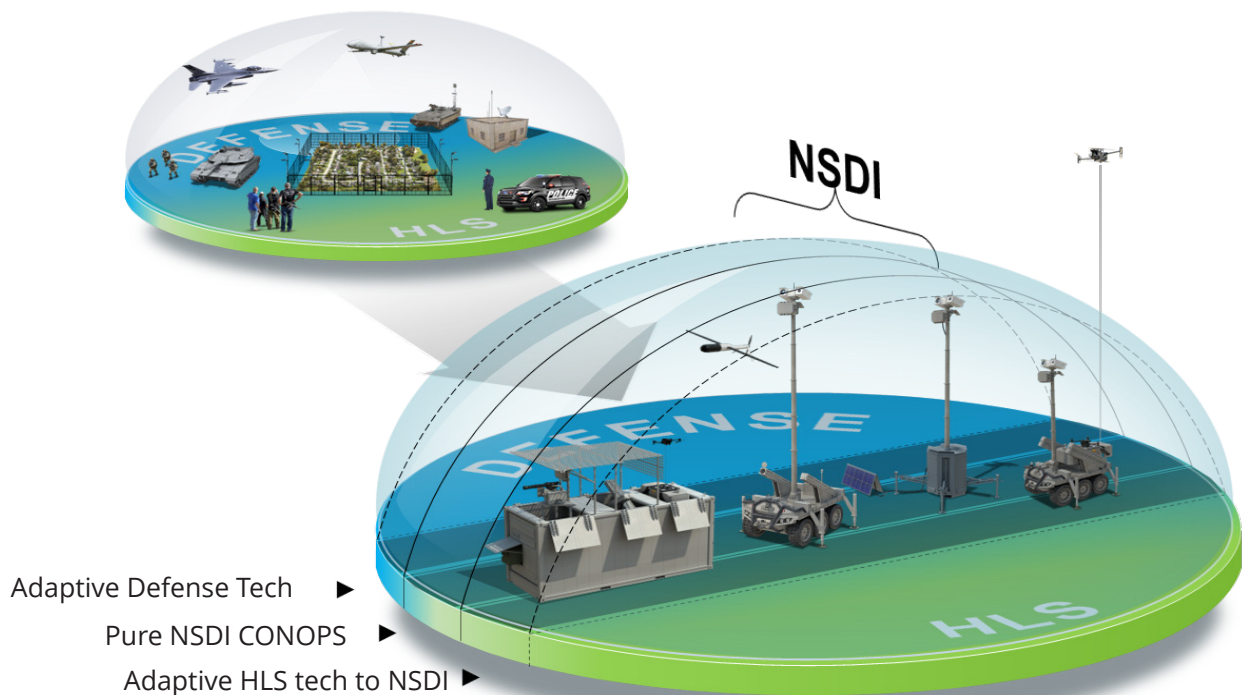

Tailored to customer needs, the Fusion Center creates a centralized hub for smart monitoring and surveillance, enhancing efficiency and reducing time to action.

# National Security & Defense Integration (NSDI)

*Harmonizing military defense capabilities with Homeland security to innovate and strengthen safety and resilience.*

ARFG introduces a groundbreaking approach to National Security and Defense Integration (NSDI) through its hyper-modular systems. This innovative strategy showcases the company's forward-thinking, delivering added value by addressing complex challenges with unprecedented speed to market. Each product within this framework offers multiple capabilities, ensuring versatile solutions that meet a wide range of security needs. By seamlessly integrating advanced technologies, ARFG solves problems that others have overlooked and sets a new standard in defense and homeland security solutions.

"Decurity" describes the seamless integration of military strength and homeland security tactics to create a comprehensive approach of protecting a nation's citizens and infrastructure.
